Sapphire AND STEEL

Break through the barriers of time on a journey to unknown dimensions.

The future plunges into the present. The past collides with the future. Time overturns reality, captures your consciousness and takes you to altered states. Eerie, frightening forces are at work.

Only *Sapphire and Steel* can stop these strange events and restore natural order to the universe. Sapphire (JOANNA LUMLEY–*The New Avengers*) and Steel (DAVID McCALLUM–*The Man from U.N.C.L.E.*) are two superhuman agents assigned to safeguard the structure of Time. With uncanny powers, they protect the present from invading evils of the past and future.

Their spine-tingling, supernatural missions take them to an invisible penthouse that arrives from 1500 years in the future, where an innocent baby instantly transforms into a menacing, fully-grown man. Or to a remote, abandoned railway station that clamors with restless spirits in search of eternal peace. Even to a party where bizarre science fiction murders stretch the imagination and boggle the mind.

Sapphire and Steel is an unforgettable, sci-fi excursion for the whole family with tantalizing, time-warped adventures to mysterious, unknown dimensions.
